## Streamliner Jukebox : Retro Style, Modern Luxury

Step into a world where vintage elegance meets contemporary luxury with the Streamliner. Drawing inspiration from the past but striding confidently into the present, the Streamliner captivates with its stunning combination of aluminium and wood finishes. The upper aluminium panels are primed, painted, and hand polished for a high quality deep gloss finish which contrasts perfectly with the unique "Pyramid texture" of the wooden lower cabinet. The quilted, diamond-stitched faux leather interior panels add layers of sophistication, making this jukebox a true centrepiece. Designed with meticulous attention to detail, the Streamliner features a 50s-style chromed 'V' speaker grille and knurled aluminium selection buttons, offering a tactile experience reminiscent of a vintage automobile. Subtle LED mood lighting at the rear of the cabinet casts a gentle, enhancing glow, while the backlit, solid metal cast Sound Leisure insignia proudly displays its artisanal quality.

Beyond its striking looks, the Streamliner is equipped with Sound Leisure's cutting-edge S3 Unity technology, ensuring seamless playback whether spinning vinyl singles, LPs, CD's or streaming via Bluetooth. The Streamliner's powerful D4 amplifier and refined speaker system delivers that undeniable "jukebox" sound, bringing every track to life. Customizable and hand-built to order, the Streamliner is more than just a jukebox—it's a bespoke statement piece that reflects your style and passion for music. Discover the Streamliner today and elevate your space with the perfect fusion of retro elegance and modern luxury. Available formats: CD, Vinyl LP, and Vinyl 45.
